

## JELV NTI 2021-2022

Dear families,

Included with this letter, you will find our short term Non-Traditional Instructional (NTI) plans designed for up to 10 snow/cold weather days. These will be used when we need to take a day or two off due to snow/cold weather that prevents us from safely traveling to school!

In the packet, you will find two rows of activities. The top row has a digital component to each activity (these links will need to be accessed digitally), while the bottom row is hands on activities to do with supplies you may have in your home. We are asking families to complete one activity in each area, and to read a book together each NTI day. Please keep this packet in your child's folder so that it is always accessible on snow days.

There is a different page for each day, including activities that focus on different developmental areas. Please initial, highlight, or circle the activities you choose to do together. **We will also post NTI pages on our google classroom so that you can also access it digitally.**

When school is back in session, please make sure your child returns their "NTI page" for the specific day, so that your child can be recognized with participation in this short term NTI instruction. You can also submit a photograph of the paper on our google classroom. We want to make sure we can document your participation.

I am available all day on a snow day through our class Remind or by email. Please contact me if you need me!

"I Like Warm Hugs"-Olaf
